APG ARCHITECTURAL SIGN SYSTEMS

Our specialization is the interior design of public areas with signage systems.

For over 20 years, we have been cooperating with the leading European companies – producers. We offer modern solutions for administrative, public, office and industrial buildings.

Our company has a lot of experience in cooperation with customers from Latvia and other countries. We have our own manufacturing base in Latvia with the large warehouse of materials and developed technologies.
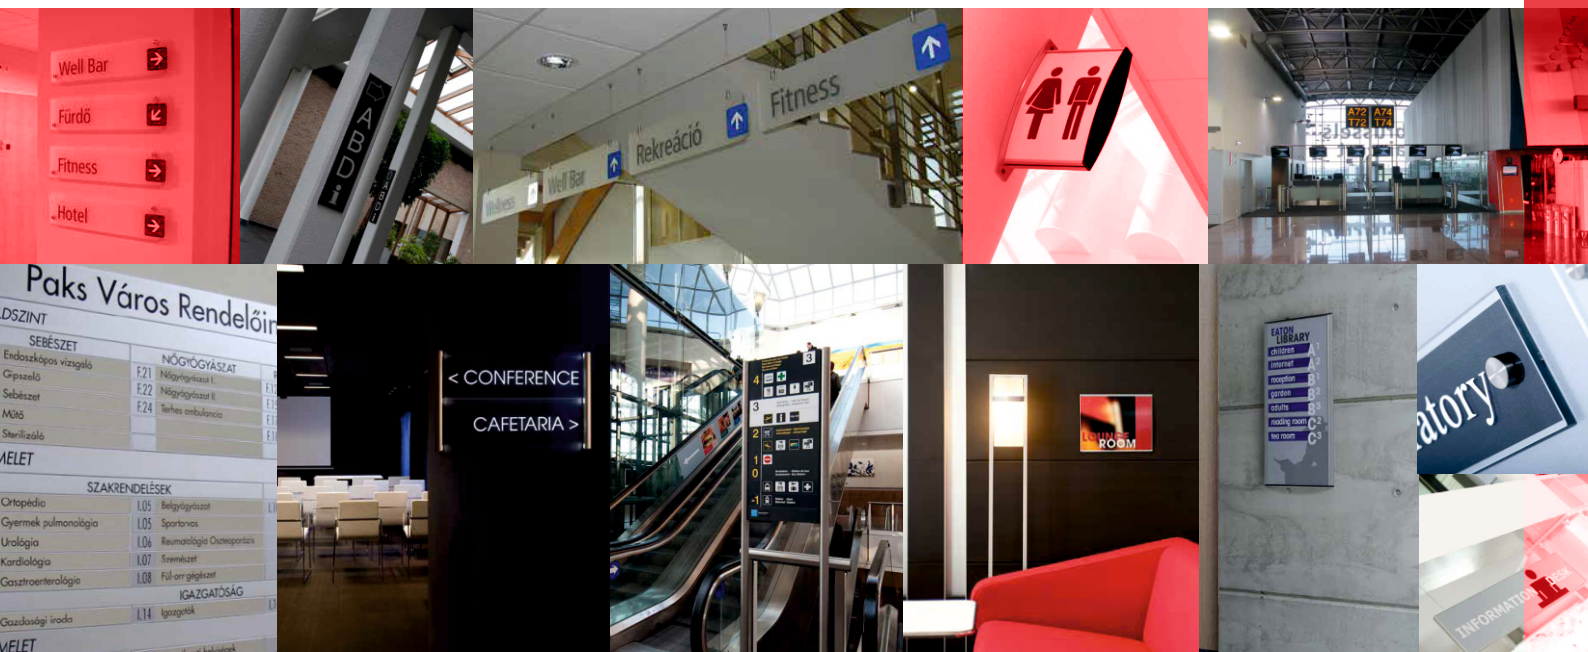

We offer more than 500 ready signage system solutions. Our designers have great experience in designing and layout visualization of different complexity.

Our specialization:

- signage systems from anodized aluminum – wall-mounted and freestanding;

- organic glass products of any complexity, with or without backlight;

- high-quality, thin light panels;

- information protection;

- special floor anti-slip tapes.

Our company is ready for cooperation with specialists.

Best regards,
APG team

1.3.

Curvo Plus

Curvo Plus is a modern, indoor sign system made from high-quality aluminium and executed in a stylish design with gently curved profiles and rounded corners.

The tabs with a stainless steel look keep the signs and the anti-reflective covers in place and give the signs extra cachet.

Moreover, the tabs are the same for all profiles. This limits the number of components and simplifies installation. It is possible to inscribe or print directly on the profiles.

MAGNETIC PANEL 16 *Best product*

Aluminum magnetic profile system for ultrathin double-sided flat light panels up to A0 size with front board 8 mm LED lighting. As a faceplate is used transparent PET-plastic 1,5-2 mm (the thickness of the plastic depends on the size of a panel). Plastic is fixed in the panel with special magnetic tapes (Type A + Type B). To cover magnetic tapes along the perimeter of the faceplate should be made «edging frame» (recommended width – 30 mm). «Edging frame» can be painted or made of vinyl film. The faceplate can be removed with a special suction cup.

Large Magnetic Light Box

3.3.
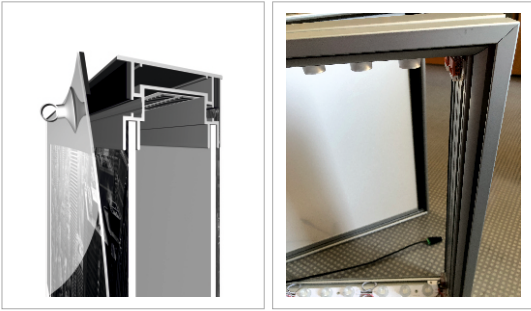

Elegant indoor lightbox with a depth of only 75mm (single-sided) or 100mm (double- sided). The hinging frame on top makes maintenance and a quick change of the acrylic panels and/or graphics extremely easy.

The hinging frame comes in 2 versions. One has the typical I-Sign look with the thin edge. The other one has an edge of 12,5mm which allows acrylic panels to be fully illuminated.

The perfect lightbox for airports, metro stations, garages.

3.4. SOLED

SOLED is an architectural sign application where a LED strip is integrated into the profiles that ensures the light is introduced in a glass or acrylic sheet from the side. This ensures that the image on the front of the sheet is lit up. The image can easily be added to the sheet using a film or it can be engraved into the sheet.

SOLED is a modular system where the customer can choose between a round, curved or square profile ad where the signs can be wall mounted, suspended or flag mounted.

BASIC | ROUNDED | CURVED | SQUARED | CURVED & SQUARED — 35 mm

MODULE PLUS OUTDOOR (on request)

4.4.

Module Plus outdoor is the complete external directional sign system. As well as being both modular and interchangeable, Module Plus is extremely robust. The system consists of three post options - circular, elliptical and square - together with a range of panels available at 46 mm, 60 mm, 100 mm, 150 mm and 250 mm high. The use of panel supports and 8 mm or 4 mm (reduction profile) thick foam PVC allows the customer to create a custom panel of any depth. Accessories include a range of post caps, post feet and luminaires. Post and text panels can be supplied as components or cut to size lenghts.
